Dear Mr Md. Anisur Rahman Bhuiyan,

I hope you are well.

I am writing to inform you about a prestigious scholarship programme that extends a great opportunity to your students interested in studying in the UK after graduation.

The British Council and Newcastle University, UK have launched 5 fully funded scholarships for women from South Asia aspiring to study a relevant STEM postgraduate programme in 2022. We are looking for women with a background in STEM, who can demonstrate their need for financial support and who wish to inspire future generations of women to pursue careers in STEM. Each of these scholarships cover full tuition fees, monthly stipends, a return economy class ticket and other study-related costs such as IELTS exam fee, visa application, NHS surcharge and study materials.

The following programmes are eligible for the BC Women in STEM Scholarship at Newcastle University:

- MSc Agricultural and Environmental Science
- MRes Cancer
- MSc Environmental Engineering
- MSc Environmental Consultancy
- MSc Global Public Health
- MSc Hydrogeology and Water Management
- MSc Hydrology and Water Management
- MSc Renewable Energy, Enterprise, and Management (REEM)
- MSc Sustainable Agriculture and Food Security

The last date to apply for the scholarship is 1st April 2022.

More information about the scholarship scheme can be found on our [funding page](#) and the British Council website. Further details about the scheme can also be found in the **British Council Scholarships for Women in STEM regulations** (PDF:93 KB).

We encourage you to share details about this scholarship with interested stakeholders – students, parents, and academics. You can listen to the experiences of the current BC Women in STEM scholars at Newcastle University [here](#).

About Newcastle University, UK

Newcastle University is a world-class university established in 1834 with an international reputation for academic excellence. We are a founding member of the elite Russell Group, a group of 24 highly research-intensive universities in the UK. Our high-quality teaching, strong research profile, and outstanding student support make us one of the most popular universities in the UK. Situated in the heart of one of the UK's most dynamic student cities, Newcastle University is home to over 28,000 students, with more than 5,400 international students from over 115 countries. With a strong focus on internationalisation, we have prestigious partnerships with institutions and multinational companies across the globe.

As a top 150 university in the world (134th in QS World University Rankings 2022), we are a global leader in ageing and health, data, energy, cities, and the creative arts, and many of our 225,000 alumni are leading the way in sectors as diverse as digital technology, finance, and fine art. We rank **3rd in the UK (The Times Higher Education Impact Rankings 2021)** for our impact on society and leadership in sustainable development. Newcastle is recognised as a global sustainable development leader. Through our Global Challenge Academy, we are committed to working across national borders and academic disciplines to help address the development
